

Secure Portal

PROACTIVE FRAUD DETECTION

Secure Portal detects the following threats in real time without installation of any additional software on client devices:

- Unsolicited access to personal accounts and sensitive data
 - Bank card data collection and purchases paid for by stolen cards
 - Bonus card theft
 - Stealing in-game items
 - Use of bots to guess passwords, cheat in voting competitions, place reviews
 - Comparative advertisements misleading customers away from official websites
 - Joint use of paid subscriptions
- And other fraud schemes.

Growing customer databases can be leveraged both by cybercriminals and your competitors.

Secure Portal uses unique data, device fingerprinting technology and own machine learning solutions to detect fraudulent activity as soon as the user enters your website.

Save your money

Reduce the number of chargebacks from stolen bank cards used to pay for goods and services

Decrease financial loss caused by purchases paid for by stolen bonus cards

Reduce expenses for processing clients' complaints

Strengthen your reputation

Prevent sensitive data leaks

Enhance clients' confidence in your brand by notifying clients of fraud attempts

Prevent reputational damages

UNIQUE THREAT DATA SOURCES

High-tech infrastructure designed to collect threat data enables us to monitor new fraud tactics and timely update indicators of compromise.

THREAT INTELLIGENCE

Group-IB leverages data on compromised bank cards and accounts as well as daily updated information about TOR nodes, SOCKS proxy and other suspicious IPs to promptly detect and prevent fraudulent activity.

FORENSICS

Group-IB's Computer forensics laboratory analysts provide us with information on the most advanced malware targeting our clients.

MACHINE INTELLIGENCE

By processing large data sets on client behavior, machines detect malicious anomalies. Group-IB analysts select those related to fraud preparation and execution and develop machine learning to detect unknown fraud indicators.

WHO WILL BENEFIT FROM SECURE PORTAL:

ONLINE STORES

E-COMMERCE

CORPORATE PORTALS

PAID SUBSCRIPTION SERVICES

GAME PORTALS

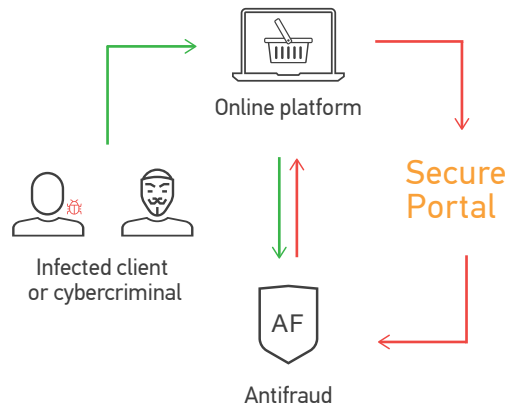

HOW SECURE PORTAL WORKS

DATA COLLECTION

The JavaScript module runs together with the webpage without any involvement from the customer. The script functions unnoticeable to the customer.

The module monitors any injection attempts on Internet pages, collects customer device identification data and monitors for signatures of malicious activity on the customer side.

The anonymized data is transmitted over a secure channel to the Secure Portal server infrastructure.

The script does not slow the page loading speed.

DATA PROCESSING

To correlate and classify the data obtained, Group-IB uses accumulated and daily updated information on the activities of fraudsters both in Russia and abroad.

If fraud is detected, Group-IB immediately informs the portal security service.

The API can be used for direct integration with fraud monitoring systems and with other portal IT infrastructure including notifications and established response procedures in real time.

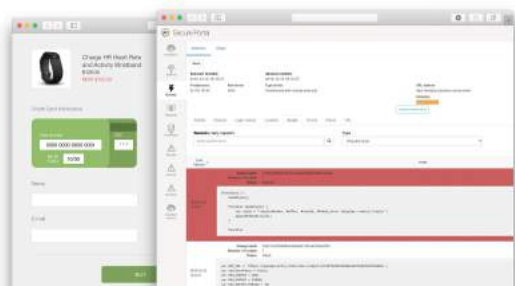

SECURE PORTAL CAN PROTECT YOUR BRAND

For theft of user credentials and bank card data, fraudsters create fake bank sites. Many of these are simply copies of original resources.

As soon as the first user enters the phishing resource, the module informs the Secure Portal system on the domain name of the website, which is detected by the module.

Secure Portal transfers the domain name detected to 24/7 CERT-GIB emergency response team, which will promptly block the phishing resource upon your confirmation.

MAXIMUM CONVENIENCE

Detailed information about each suspicious session is available in the interface.

Lightning fast implementation

It takes 20 minutes to install the Secure Portal module on your website.

Cloud interface

Professional assistance from specialists with vast experience in response to online fraud.

Documented API

Convenient integration with fraud monitoring systems and other portal IT infrastructure.

Support by analysts

Professional assistance from specialists with vast experience in response to online fraud.
